

1. (Previously presented) A balloon holder, comprising a decorative bag, a core having sufficient weight to hold at least one buoyant balloon in place and positioned within said decorative bag, and decorative material held to said core in a position to conceal said core from casual view, said decorative bag having handles extending from an upper portion thereof to serve as an attachment for a string of one or more balloons, the upper portions of said handles being secured together.

2. (Original) A balloon holder as set forth in claim 1, said core being secured to the interior of said decorative bag.

3. (Original) A balloon holder as set forth in claim 2, said decorative material being formed from a length of decorative sheet material having its upper portion cut into a series of strips adapted to extend outwardly from said decorative bag and its lower portion secured around the periphery of said core.

Claims 4-7 have been cancelled.

8. (Previously presented) A holder for a balloon as set forth in claim 1, including an inner liner fitted within said decorative bag, said core being held to the interior of the lower portion of said inner liner and said decorative material being held to the upper periphery of said inner liner.

9. (Previously presented) A balloon holder as set forth in claim 8, said decorative material being formed from a length of decorative sheet material having its upper portion cut into a series of strips adapted to extend outwardly from said decorative bag and its lower

portion held around the upper periphery of said inner.

Claims 10-13 have been cancelled.

14. (Original) A balloon holder as set forth in claim 1, said decorative material being formed from a length of decorative sheet material having its upper portion cut into a series of strips adapted to extend outwardly from said decorative bag and its lower portion held within said decorative bag.

Claims 15 and 16 have been cancelled.

17. (Currently amended) A balloon holder, comprising a decorative bag, means including a core formed of a weighty mass of dense material provided with sufficient weight for holding a plurality of buoyant party balloons in place, said core being positioned within said decorative bag, and means including decorative material secured within said bag in a position to conceal said core from casual view and extending outwardly from said bag as the balloon holder is displayed for retail sale for providing decorative appeal for the balloon holder at retail display, said decorative bag having handles extending from an upper portion thereof to serve as an attachment for a string of one or more balloons, the upper portions of said handles being secured together.

18. (Previously presented) A balloon holder as set forth in claim 17, said core being secured to the interior of said decorative bag.

Please cancel claim 19.

20. (Currently amended) A balloon holder, comprising a decorative bag, a core

formed of a weighty material adapted to hold one or more buoyant balloons in place and secured to the interior of said decorative bag, said decorative bag concealing said core from casual view, said core having sidewalls generally trapezoidal in shape to taper towards the upper portion of said decorative bag, said decorative bag having handles extending from an upper portion thereof to serve as an attachment for a string of one or more balloons, the upper portions of said handles being secured together.

Claim 21 has been cancelled.

Please cancel claim 22.

23. (Previously presented) A balloon holder as set forth in claim 17, said core being formed of compressed sand held by an adhesive material.

24. (Previously presented) A balloon holder as set forth in claim 17, said core being formed of compressed sand, cement and water mixture.
